

## VILLAGE GLEN APARTMENT RENDER SAFE OPERATION

### Mandatory Evacuation Notice

A mandatory evacuation is required for all residents of Village Glen Apartments (including buildings 103, 105, 107, 111, 113) during the planned burn of building 109 on **Wednesday March 14<sup>th</sup>, 2018**. Please leave the closure area by 9:00 am. When you leave your apartment in the morning, take your purse, pills, pets, phones and valuables with you. If you forget something, you will not be allowed to return. Safety officers and police will be going door to door at 9:30 am to confirm residents have left. The burn is scheduled to start at 10:00 am. Note that once you leave the area you will not be allowed to return until the area is deemed safe. School buses will take children to school as normal in the morning but alternate arrangements will be made for drop off in the afternoon. The goal is to complete the burn and allow residents to return home by evening. During the time you are evacuated, you are welcome to stay at the St Katherine Drexel Parish Center at 408 South Spring, which is our Family Assistance Center. You can come and bring your pets and spend the day there. Please note that you will be responsible to control your pets at St Katherines. Only domestic pets will be allowed. Food and water will be provided. We do not anticipate this going overnight, but if it does St Katherine's will also serve as an overnight shelter. When roads are reopened, it will be indicated on the Beaver Dam Police Department Facebook page and announced at the St. Katherine Drexel Parish Center.

Remember! When you leave your apartment in the morning, take your purse, pills, pets, pet food, pet carriers, phones, and valuables.

# VILLAGE GLEN APARTMENT RENDER SAFE OPERATION

## INCIDENT INFORMATION

March 11, 2018

### BACKGROUND

- On March 5<sup>th</sup>, the Beaver Dam Police and Fire Departments responded to an explosion at the Village Glen Apartments, Building 109. A small fire was extinguished and a deceased male was discovered in one of the apartments.
- Responding agencies discovered a number of hazardous chemicals in the apartment where the explosion occurred. Numerous state and federal agencies were called in to investigate.
- Due to the volatile nature of the chemicals that were found in Building 109, it has been permanently evacuated. No one is allowed to enter this building, including all agency personnel.
- It was determined that the safest way to mitigate the risk from the chemicals in the apartment is through "thermal destruction" which means we plan to intentionally burn building 109. It is the heat that will be generated by this fire which will render the situation safe.

### PLANNED OPERATIONS

- We are planning the intentional structure burn of Building 109 for Wednesday, March 14, 2018.
- At 9:00 a.m. on Wednesday morning, the outer perimeter will be closed to traffic (see map on last page). No civilian traffic will be allowed to enter after this time.
- We are doing a mandatory evacuation for those nearest Building 109 as per the recommendation of the FBI. This will affect residents living in Buildings 103, 105, 107, 111 and 113. It also affects part of two nearby facilities (Prairie Ridge and Keystone Manor) where people will be shifted internally within their building to get them out of the inner zone of concern.
- All other residents and businesses in the area of the Village Glen Apartments (within the area of Knaup Dr., N. Spring St. from Woodland Dr. to Industrial Dr. E., and Industrial Dr. E. to but not including HWY 151) are recommended to evacuate or shelter in place. Shelter in place means to seek safety within the building one already occupies. All windows and doors should be closed and all people and pets should stay inside.
- Around 10:00 am, Building 109 will be intentionally ignited.
- The goal is to complete the burn and allow activity to resume in the area by evening.
- When the closure is lifted, it will be posted on the Beaver Dam Police Department Facebook page.

## GE GLEN APARTMENT RENDER SAFE OPERATION

### **FOR RESIDENTS OF BUILDINGS UNDER MANDATORY EVACUATION: 103, 105, 107, 111, 113**

- Please leave the closure area by 9:00 a.m.
- Law enforcement will do building checks at 9:30 a.m. to make sure that all residents have evacuated.
- During the time you are evacuated, you are welcome to stay at the St. Katherine Drexel Parish Center, which is our Family Assistance Center. St. Katherine's will be open starting at 8:00 a.m. You can come and bring your pets and spend the day there. Food and water will be provided. Counselors will be on hand.
- Everyone who is evacuating the area needs to take purse, pills, pets, pet food, pet carriers, phones, and valuables with them when they leave. Once you leave the area, you will not be allowed to reenter even if you forgot something and emergency workers will also not go in after something you left behind. Please plan accordingly.
- Please note that you are responsibility for your pets at St Katherine's. Only domestic pets will be allowed.
- We do not anticipate this going overnight, but if it does St Katherine's will also serve as an overnight shelter.
- Residents in the evacuated area will need to have a plan in place for the end of their day. You will not be able to return to your property until the closure is lifted (anticipated for evening). St. Katherine's will be available to you.
- For those in the evacuation area, you will get information from the school on where afternoon buses will drop off kids.
- If you live in Building 113, we ask that you remove firearms and ammunition before Wednesday. If you have any questions about your specific situation, please contact the Emergency Operations Center phone line listed later in this document.

### **FOR RESIDENTS OF BUILDINGS 109 & 113 ONLY**

- There will be a heated tent in place in the old Applebees/Freber's Jewelry parking lot at 1740 North Spring so that you can view the operation. Counselors will be available on site. Plan to arrive by 9:00 a.m. You can leave at whatever time you like but once you leave, you will not be allowed to reenter.

## VILLAGE GLEN APARTMENT RENDER SAFE OPERATION

### FOR THE MEDIA

- Media is welcome to set up in the parking lot of the Farm Fleet gas station as many have been doing all week. You will be just outside the outer perimeter here for safe viewing.
- The next media briefing tentatively for Wednesday 4:00 p.m. Currently we are planning on doing this briefing right there in the parking lot.
- Critical information updates will be posted to the Beaver Dam Police Department Facebook page.

### FOR THE GENERAL PUBLIC

- We ask everyone to avoid the noted area on Wednesday for safety of the public and agencies on scene.

### DONATIONS

- An account for monetary donations has been opened to assist the residents of building 109. Donations can be made at any Dodge County Horicon Bank location. The name of the account is *Dodge County COAD / Beaver Dam Apartments*.
- Any non-monetary donations should go to St. Vincent DePaul or American National Bank. Please do not drop off any items at the Village Glen Apartments.

### SUPPORTING ORGANIZATIONS

- We would like to thank the numerous organizations are working on this incident including:
  - numerous Beaver Dam City Departments
  - Dodge County Emergency Management
  - Dodge County Sherriff's office
  - Dodge County Human Services and Public Health
  - Watertown Department of Public Health
  - American Red Cross
  - Salvation Army
  - East central area and local incident management teams
  - Numerous other state and federal partners

## Village Glen Apartments Render Safe Operation Burn Plan

109 Knaup Drive, Beaver Dam Wisconsin

This burn plan is to outline the fire protection of the Village Glen Apartments Render Safe Operation thermal destruction of 109 Knaup Drive. This operation will be defensive only – there will be no interior operations conducted in 109 Knaup Drive.

There will be nine strategically located unmanned ground monitors protecting the obvious exposure structures in the area. These will be supplied either by engines or the Beaver Dam trucks. 4 Engines will be placed near the 105 building, 212 Industrial (Prairie Ridge) and Beaver Dam and Juneau Trucks will be placed near the 113 building. The Juneau truck is to protect the 113 building ~~OR building~~ should the need arise. See attached map. When possible, apparatus shall be placed facing out for egress, with the panel side away from the 109 building. The only personnel allowed inside the 500" mark is command staff and pump operators. There will be a taskforce staged at 121 Knaup Drive to attack the 113 building. Staging for the 113 task force

If there is an exposure fire to the 113 building this fire will be attacked with interior operations. There will be preplaced uncharged attack hose lines on the east and west side of the 113 building.

There will be a tender strike team staged on industrial Drive near 212 Industrial. Engine 1263 at 212 Industrial will be set up for both city and rural operations as a redundant water source. The Tender Strike team will supply E1263. Fill sight for tenders will be at ???

We are also having large shipping containers delivered and placed as a thermal barrier between the 109 building and the 113 building and the garage between the two. We expect these shipping containers to be delivered and in place on Tuesday March 13, 2018.

Add to  
Thermal Plan

# VILLAGE GLEN APARTMENT RENDER SAFE OPERATION

## TALKING POINTS

FOR COMMUNITY MEETING & MEDIA BRIEFING

SUNDAY, MARCH 11, 2018

<p><b>Opening comments</b></p>	<ul style="list-style-type: none"> <li>• Good afternoon, I am Beaver Dam Police Chief John K. Thank for you attending this very important informational meeting. Our purpose today is to tell you what we have planned for the coming days. We will not be addressing the investigation into the original events at this time. The Beaver Dam Police Department has the lead on the on-going investigation with support from the FBI.</li> <li>• Please hold your questions until the end.</li> </ul>
<p><b>Incident Background</b></p>	<ul style="list-style-type: none"> <li>• I'll provide a very brief overview of the event to date.</li> <li>• On March 5<sup>th</sup>, the Beaver Dam Police and Fire Departments responded to an explosion at the Village Glen Apartments, Building 109. A small fire was extinguished and a deceased male was discovered in the apartment.</li> <li>• Responding agencies discovered a number of hazardous chemicals in the apartment where the explosion occurred. Numerous state and federal agencies were called in to assist with determining the cause of the explosion.</li> <li>• It was determined that the safest way to mitigate the risk from the chemicals in the apartment is through "thermal destruction" which means we plan to intentionally burn building 109. It is the heat that will be generated by this fire which will render the situation safe.</li> <li>• Building 109 is permanently evacuated. No one is allowed to enter this building due to serious safety concerns.</li> </ul>
<p><b>Planned Operations</b></p>	<ul style="list-style-type: none"> <li>• We are planning the burn for Wednesday, March 14, 2018. This is how the day is planned to go.</li> <li>• At 9:00 a.m. on Wednesday morning, the outer perimeter will be closed to traffic (see map).</li> <li>• We are doing a mandatory evacuation for those nearest Building 109 as per the recommendation of the FBI. ## VILLAGE GLEN APARTMENT RENDER SAFE OPERATION

- During the time you are evacuated, you are welcome to stay at the St Katherine Drexel Parish Center, which is our Family Assistance Center. You can come and bring your pets and spend the day there. Food and water will be provided.
- Once you exit the area in the morning, you will not be allowed to return until the area is deemed safe.
- Everyone who is evacuating the area needs to take purse, pills, pets, pet food, pet cages, phones, valuables. Please note that you are responsible for your pets at St Katherines. Only domestic pets will be allowed.
- We do not anticipate this going overnight, but if it does St Katherine's will also serve as an overnight shelter.
- Around 10:00 am, Building 109 will be intentionally ignited.
- We are taking many precautions to defend Building 113 which is very nearby.
- All other residents and businesses in the area of the Village Glen Apartments (within the area of Knaup Dr., N. Spring St. from Woodland Dr. to Industrial Dr. E., and Industrial Dr. E. to but not including HWY 151) are recommended to evacuate or shelter in place. Shelter in place means to seek safety within the building one already occupies for both people and pets. All windows and doors should be closed.
- Road closures in the area will prevent the public and business owners from leaving or accessing the area during the day Wednesday.
- The goal is to complete the burn and allow activity to resume in the area by evening.
- Residents in the inner area will need to have a plan in place for the end of their day. You will not be able to return to the area until it is deemed safe. Again, we anticipate an evening timing. Again, St Katherine's is available to you. For those in the evacuation area, you will get information from the school on where afternoon buses will drop off kids.
- When roads are reopened, it will be indicated on the Beaver Dam Police Department Facebook page. You will also be notified that you can return home through the same means.
- If you live in Building 113, we ask that you remove firearms and ammunition before Wednesday. If you have any questions about your specific situation, please approach us after the meeting.

- The incident information phone number is 920-319-4410
- An Emergency Operations Center will be opened starting at 7:00 a.m. on Monday, March 12<sup>th</sup> through 7:00 p.m. on Monday and Tuesday. On Wednesday 7:00 – 4:00. 920-887-4600 ext 250 or 241

Got it

Ps Northshore will be on site tomorrow to manage garage wastes

EPA will be on site tomorrow to set up air monitoring

Spoke with waste program, it is agreed after burn we are managing only a solid waste, can work with property owner, no need to sort metal, etc

Spoke with air management, asbestos would be only issue of concern.

Mike

Chris,  
Attached is a map of traffic positions. Also attached is form 204 giving descriptions of position assignments.

Dodge County Sheriff will handle any detour caused by closing US 151. I will be meeting with Captain Enright tomorrow to verify their leader and contact information.

Lt. Altman said he would have State Patrol handle all city traffic as well as monitoring US 151. I will be in contact with him to verify plans.

I will be meeting city DPW tomorrow morning to finalize road closed signs and barricades.

Any question or concerns please let me know.

Thank you

Brandon

(Added)

## **Phase One – 0800-0900**

Clearance of the apartment buildings:

- 111 Knaup Dr – 531, 521
- 103 Knaup Dr – 533, 518
- 105 Knaup Dr – 532, 517
- 107 Knaup Dr – 540, 526, 538
- 113 Knaup Dr – 525, 530, 522, 529 (Will have keys to enter the apartments to physically clear all apartments)

\*While it is mandatory that all tenants evacuate, we cannot physically remove them. 113 Knaup Dr is the exception. Use the utmost professionalism should you have to physically remove a tenant from 113.\*

Once buildings are cleared, radio in that building is clear. If any tenant has refused to leave, radio in what building and apt number that are at. After finished clearing, then move to assigned position.

## **Phase Two – 1000-TBD**

Building will be lit. Monitor the area for anyone trying to enter the inner perimeter. Also monitor inside perimeter for anyone inside the inner perimeter.

Should smoke develop and wind directs it to your position to where you feel unsafe, move to the secondary location and radio in that you have do so. If smoke or environment in your primary or secondary post, you will move to the outer perimeter to monitor.

Quick Response Team with respond inside the perimeter if someone needs to be extracted from the inner perimeter.

### **Phase Three – 2pm – TBD**

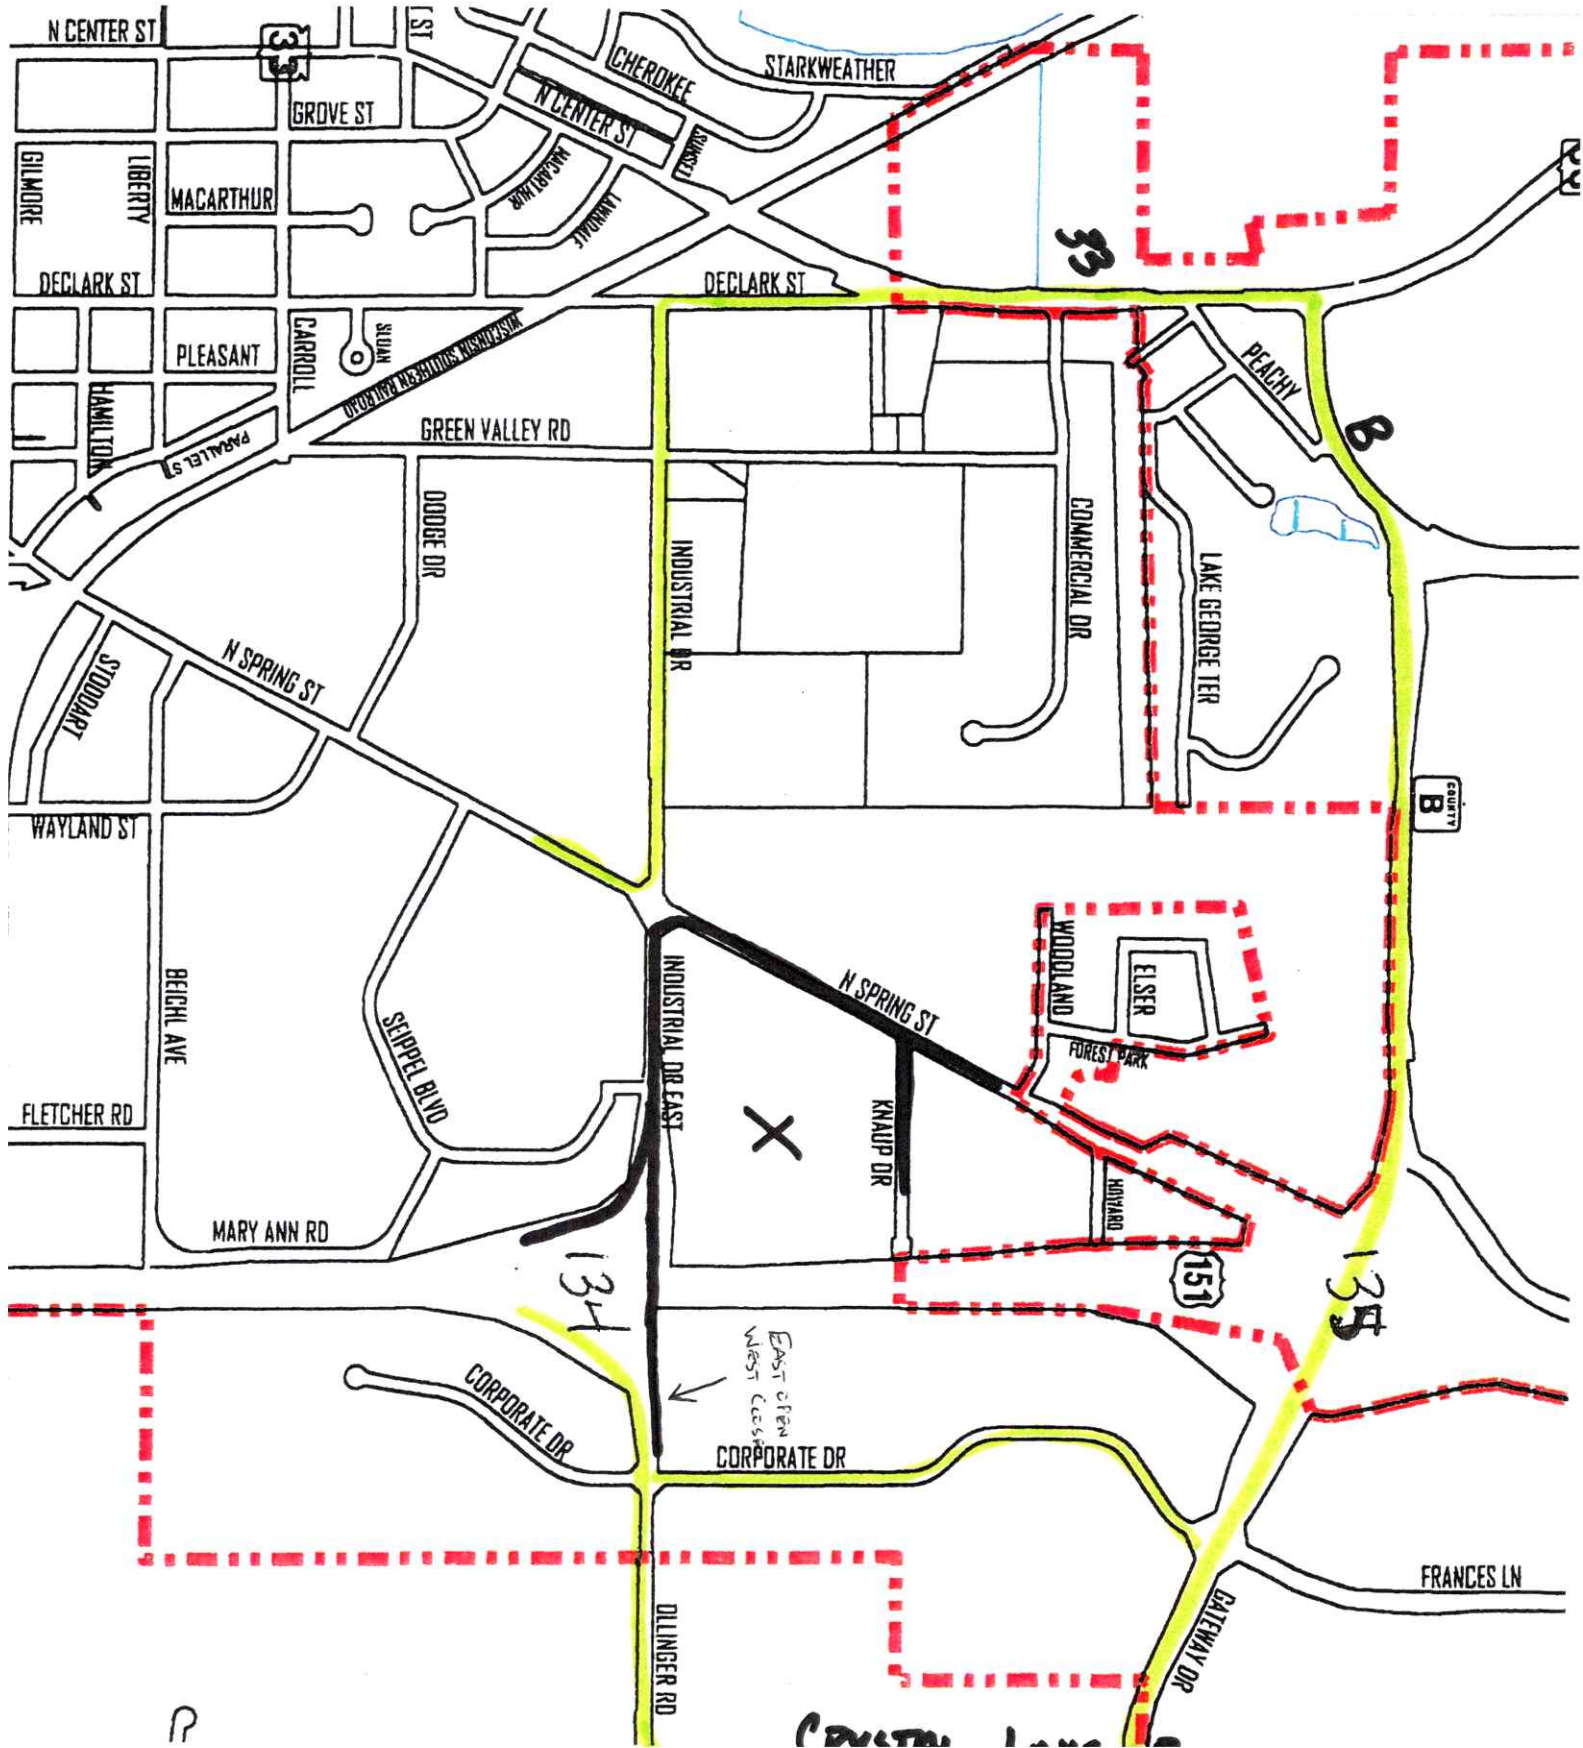

At 2pm:

- 525 will relieve 535
- 530 will relieve 532

Upon announcement, positions B and D will be able to complete their post.

Further announcement will come for others posts to be completed.

Once all posts are completed, one officer will post at the burn site with a member of the fire department for site security.

**Subject:** Re: Sit Rep plus

See attached updated version of the IAP. I know it may need to be tweaked a bit more, and our guys at the EOC tomorrow can do this.

I will be at the City PD / EOC in the morning

**Subject:** Re: Sit Rep plus

The address on the sit rep is wrong, it's 109 Knaup Drive, not the woodland address I had. Please see file revised attached.

# GENERAL SAFETY MESSAGE

This incident involved the potential production of TATP and or chemical precursors associated with its manufacture.

**1. TATP (Triacetone Triperoxide) is a homemade, high explosive material made from three common chemicals that include Acetone and Hydrogen Peroxide. Its strength is approximately 80% of TNT with a RE Factor 0.80.**

**2. TATP looks like a drug powder. It is a white-yellow-brown crystalline powder that looks like meth or cocaine.**

**3. Warning: Officers using a field drug test kit can cause TATP to detonate due to the sulfuric acid in the test kit. Do not use a field drug test on powder that could be TATP.**

The destruction of the residual explosives inside the structure will be completed using Thermal decomposition of remaining chemical residues and or finished explosives remaining in the structure. To accomplish this, the structure must reach a sustained temperature exceeding 600 degrees F for at least four hours. Typical Class A material such as a stoked wood fire will usually exceed 1400 degrees F. Since this building has not been prepared for a burn such as having other hazardous materials and furniture removed, we can expect the fire to be much hotter. Likewise, we can anticipate the building contents to include normal household hazardous materials such as cleaning supplies, paints, aerosol cans and cosmetics. Pressurized containers such as the boiler, water heaters and CFC devices such as refrigerators can explode (BLEVE). Because of these hazards, we want the fire to burn uninterrupted for as long as possible with no water application interacting with the fire. Further we will need to maintain adequate standoff distances from the fire to avoid any energetic materials as well as those normal household materials left inside the building.

We can anticipate localized toxic smoke conditions inside the evacuation zone area until the fire reaches adequate temperature to accomplish thermal uplift. As an example, any item containing chlorofluorocarbon (CFC) such as refrigerators, freezers, window mount A/C units, HVAC system (roof or ground mounted) may form phosgene or carbonyl fluorides when burned.

The smoke released by any type of fire (forest, brush, crop, structure, tires, waste or wood burning) is a mixture of particles and chemicals produced by incomplete burning of carbon-containing materials. All smoke contains carbon monoxide, carbon dioxide and particulate matter (PM or soot). Smoke can contain many different chemicals, including aldehydes, acid gases, sulfur dioxide, nitrogen oxides, polycyclic aromatic hydrocarbons (PAHs), benzene, toluene, styrene, metals and dioxins. The type and amount of particles and chemicals in smoke varies depending on what is burning, how much oxygen is available, and the burn temperature.

The plan for this fire is to maintain as hot a temperature with corresponding thermal updraft as possible. This should consume a large quantity of contaminants in this smoke. If you are operating in your area of assigned responsibility (AOR) and are being exposed to smoke, you must immediately vacate the area or implement the use of an SCBA. Engine Operators should be prepared to operate in SCBA.

# GENERAL SAFETY MESSAGE

Only Engine Operators Division Commanders and Safety Officers have authorization to work inside the evacuation zone (see map). If it is authorized for others to work within the zone you will receive word through command regarding who is authorized. In short if you are not authorized to be there do not enter.

Law Enforcement staff will be responsible for perimeter security, pre burn building clearance, and contingency plans associated with US 151 closure in the event smoke causes traffic safety concerns.

Although Safety is the responsibility of all involved in this incident, we will have two dedicated incident safety officers assigned to the event. The safety officers responsibility is to serve as a primary clearinghouse for safety related questions and issues. They are part of the command staff and report directly to the Unified Commanders. As such the Safety Officers will be given the same regard as a direct order from the Unified Commanders.

A Quick Reaction Force (QRF Task Force) made up of two LE Officers and two Firefighters will be staged with full PPE and a gator to respond to emergencies inside the exclusion zone. They will be monitoring all radio frequencies and be staged at the Incident Command Post. The QRF will be deployed at the discretion of the Safety Officers and or Command staff to respond to any life safety or security perimeter breach inside the exclusion zone during thermal destruction.
